

Investment Objective

Blueprint Conservative seeks capital appreciation with conservative levels of risk over full market cycles while generally maintaining broad global diversification. The strategy is dynamically managed, striving to take advantage of global market opportunities while focusing on downside risk management by changing allocations in response to market conditions.

Strategy Strengths

- Downside protection
- Reduced portfolio volatility
- Improved risk-adjusted returns
- Enhanced absolute returns over full market cycles

Investment Strategy

The strategy consists of two portions, strategic and tactical, both of which are dynamic in nature. The strategic allocation is broadly diversified across eight asset classes attempting to take advantage of opportunities across global capital markets, while the tactical portion adjusts portfolio allocations with risk management as the primary objective.

Disclaimer

Not a recommendation of any security or strategy. Intended for informational purposes only. Investing contains significant risks, including the risk of loss. Investment decisions should be made based on the investors specific financial needs and objectives.

Past performance is not indicative of future results. The information provided in this fact sheet relating to the Blueprint Conservative (20% Strategic) sub-strategy has not been GIPS-verified. The information has been obtained from sources believed to be reliable and is accurate to the best of our knowledge, but we can't guarantee its accuracy or completeness. Please note, this information is supplemental to the information provided as part of the GIPS-compliant presentation for the Blueprint Conservative composite.

The Conservative Benchmark is comprised of 30% MSCI ACWI Index, 10% MSCI US REIT Index, 30% Bloomberg Barclay's US Aggregate Bond Index, and 30% US Treasury Bills, rebalanced monthly. Inception date of the Blueprint sub-strategy presented is January 1, 2013. Performance results are presented in US dollars and are net of sub-advisory fees and trading expenses and reflect the reinvestment of dividends and capital gains. Actual fees may vary based on, among other factors, account size and custodial relationship. There will be brokerage commissions associated with buying and selling ETFs.

Investments involve risk and unless otherwise stated, are not guaranteed. Be sure to first consult with a qualified financial adviser and/or tax professional before implementing any strategy discussed herein. Investors should consider the underlying funds' investment objectives, risks, charges and expenses carefully before investing. The Advisor's ADV, which contains this and other important information, should be read carefully before investing. The strategy is subject to management risk and an investor's return and principal value of investment may fluctuate, so that an investment, when liquidated, may be worth more or less than their original investment. ETFs trade like stocks and may trade for less than their net asset value. Blueprint's reliance on the strategy and its judgments about the value and potential appreciation of the securities in which the strategy invests may prove to be incorrect. Overall market risk, including volatility, may affect the value of the individual instruments in which the strategy invests. The investment strategy and types of securities held by the comparison indices may be substantially different from the investment strategy and the types of securities held by the Blueprint Conservative (20% Strategic) Sub-Strategy. Blueprint Investment Partners, LLC ("Blueprint" or the "Advisor") is registered as an investment adviser with the United States Securities and Exchange Commission (SEC). Registration does not constitute an endorsement of the firm by the SEC nor does it indicate that the Adviser has attained a particular level of skill or ability.

Glossary of Terms

Alpha: A measure of performance on a risk-adjusted basis. It provides the value added that the portfolio manager adds to or subtracts from a portfolio's return.

Beta: A measure of the volatility or systematic risk of a security or a portfolio in comparison to the market as a whole.

Standard Deviation: The mathematical calculation that measures the variance over time of a set of data around its average.

Sharpe Ratio: A ratio used to measure risk-adjusted performance. It provides return vs. risk by providing a ratio of portfolio return minus risk-free return (Treasuries) vs. portfolio standard deviation.

Maximum Drawdown: Maximum Drawdown shows the maximum percentage drop in portfolio value from its high point to its low point before reversing back up. It measures the total magnitude of the maximum drops experienced by a portfolio.

*Returns are for the period from 1 January 2013 (inception date) through 31 December 2013

**Combined Assets include Assets Under Advisory, this is supplementary information.

[†]The 2017 Gross of fee return was incorrectly shown on the 2017 Conservative Composite Presentation due to stagnant valuations vs. dynamic formulas.

Blueprint Investment Partners claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Blueprint has been independently verified for the periods 1 January 2013 through 31 December 2017. The verification report is available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Notes :

- Blueprint Investment Partners is an SEC-registered asset manager creating and utilizing systematic, process-driven investment strategies. The Blueprint investment approach incorporates insights from extensive research and experience within behavioral finance and risk management. Our portfolios utilize both Time Diversification and asset-class diversification, creating a truly unique, comprehensive investment option for our clients. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- The Conservative composite contains all discretionary portfolios managed to the Conservative Strategy which has a primary goal of capital preservation and a secondary goal of providing current income over full market cycles. It is broadly diversified across global capital markets with a base allocation of 40-50% to equities and real estate and 50-60% to bonds, alternatives, and cash equivalents. The strategy is both strategic and tactical with allocations shifting according to market conditions towards bonds and cash equivalents. Its risk profile corresponds to a 40% equity and 60% bond portfolio over full market cycles. Effective 1/1/2018, the minimum account value to enter the composite is \$5,000.
- The benchmark is 30% MSCI ACWI Index, 10% MSCI US REIT Index, 30% Bloomberg Barclays's US Aggregate Bond Index, and 30% US Treasury Bills. The benchmark is rebalanced on a monthly basis.
- Valuations are computed and performance is reported in U.S. dollars.
- Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Composite and benchmark returns are presented net of non-reclaimable withholding taxes. Net-of-fee returns are calculated by deducting 1/12th the annual fee of 0.50%, on a monthly basis.
- The annual management fee schedule, applied monthly, is as follows:
1st \$15mil at 0.50%; Next \$10mil at 0.45%; Balance over \$25mil at 0.40%
- This composite was created in April 2017. A complete list of composite descriptions is available upon request.
- Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Internal dispersion is not calculated if there are 5 or fewer accounts in the composite for the full period.
- The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. If composite inception is less than three years, no value is available.
